

# Venkatesh Prasad V M

## Developer

---

C1.276, 3rd floor, 2nd cross,  
3rd main road, Domlur village  
Bengaluru, KA - 560071

**Phone:** [\(+91\) 822 022 3398](tel:+918220223398)

**Email:** [venkatesh@cogitare.space](mailto:venkatesh@cogitare.space)

**Website:** [meus.cogitare.space](http://meus.cogitare.space)

---

## Skills

- Android development
  - Java
  - C++
  - Git & Github
  - Spring Boot
  - Machine Learning, Python
  - Flutter
  - MongoDB
- 

## Experience

### **IBM CIO / Software Developer Intern**

JANUARY 2019 - MARCH 2019, BENGALURU

I worked on an internal tool that is related to finance by using Spring boot and Spring Batch.

### **The Climber (MyCaptain) / Android Captain**

MARCH 2019 - PRESENT, VIRTUAL

I am an Android Captain at MyCaptain where I teach a batch of mentees every month on basic android application development.

### **Eventbeep Entertainment / Software Engineer Intern**

MAY 2018 - JULY 2018, PUNE

Proactively worked on the Android application from scratch, that includes architectural design of the application and deploying the same in play store.

### **Lemonop / Software Developer Intern**

NOVEMBER 2017 - DECEMBER 2017, BENGALURU

Worked on the Admin interface using Spring boot and basic AngularJS with MongoDB database.

### **Shortfundly / Android Intern**

APRIL 2017 - JULY 2017, VIRTUAL

Worked on the front end of Shortfundly's Android application in Filter segment where the short film videos are filtered based on popularity, date, duration, etc.,

---

## Projects

---

### Application revamp with Flutter

MARCH 2019 (CURRENT)

Migrating Eventbeep application from native Android development (Java) to a cross-platform framework Flutter where one codebase can be maintained to deploy both IOS and Android applications.

### Fire detection using CNN

NOVEMBER 2018

Python application to create a model which detects fire with surveillance camera using Convolutional Neural Network and Google net architecture.

### ASL Recognition

JULY 2018

Application to identify American Sign Language (ASL) and identify the appropriate alphabet from the hand gesture image using Keras library in Python.

### Seat Allotment Automation

JULY 2017

Python application to dynamically allocate seats for Students during semester exams. This application is currently being used in my University.

### QP Share

MARCH 2017

Android application to upload and download semester exam question papers with a set of parameters like department, subject, year of exam, etc.,

---

## Education

---

### SASTRA University / B. Tech (CSE)

JULY 2015 - MAY 2019, THANJAVUR

Percentage - 79%

### Udacity / Nanodegree (Machine Learning)

JUNE 2018 - SEPTEMBER 2018, VIRTUAL

### Higher Secondary School for boys / 12th Grade (Computer Science)

JULY 2013 - APRIL 2015, TRICHY

Percentage - 97%

### Chinmaya Vidyalaya / 10th Grade

TILL APRIL 2013, TRICHY

Percentage - 98%

---

## Leadership Outlook

---

**Lead** at Developer Student club by Google in my University.

**Executive member** at Association of Computer Engineers in my University.

**Secretary** of Road safety patrol in my Higher Secondary School.

**Volunteer** at JRC (Junior Red Cross Society).

**House President** in my Secondary School.

---

## Additional Information

---

Hobbies: singing, pencil sketching and playing flute.

Active Hackerrank user (Points: 1250.25 - Gold level in problem-solving).

Secured 2nd place in inter-college app development competition.

Earned district 1st in Camlin color contest in school.

School 1st in NSO (National Science Olympiad).

I hereby declare that the above-mentioned information is true to the best of my knowledge and belief.
